● Step By Step Explaination of CSS Code :

1. h1 – Main Heading Style

Explanation:

- Sets heading text color to **white**
- Adds space **below the heading** to separate it from content

◊ 2. main – Layout Container (Two Different Uses)

◊ Version 1 (Contact Page – Two Column Layout)

Explanation:

- Uses **Flexbox**
- Places elements side-by-side (form + info)
- Adds spacing around content

◊ Version 2 (Normal Content Page)

Explanation:

- Restricts content width to **90%**
- Centers the content horizontally
- Adds **white background** for readability

◊ 3. .contact-form – Contact Form Section

Explanation:

- Sets **white text color**
 - Adds internal spacing
 - Rounded corners
 - Occupies **35% width** of main container
 - Used for the **form column**
-

◊ 4. .contact-info – Contact Details Section

Explanation:

- White text for contrast
- Larger text for readability
- Takes **65% width** (bigger than form)
- Shows address, phone, map, etc.

◊ 5. .row – Form Field Alignment

Explanation:

- Displays form inputs **in one row**
- Adds space between inputs
- Adds space below each row

◊ 6. input, textarea – Form Fields

Explanation:

- Makes form fields **full width**
- Removes default border
- Adds only **bottom border**
- Transparent background
- White text
- Clean modern design

◊ 7. button – Submit Button

Explanation:

- Adds space above the button
- Sets fixed width
- White background
- Rounded edges
- Bold text
- Hand cursor on hover

◊ 8. section – Content Blocks

Explanation:

- Adds spacing between content sections

◊ 9. section h2 – Section Headings

Explanation:

- Dark blue heading color
- Space below heading

◊ 10. section p – Paragraph Text

Explanation:

- Adds spacing between paragraphs

◊ 11. ul & li – Lists

Explanation:

- Indents list items
- Adds space between list entries

◊ 12. .two-column – Side-by-Side Boxes

Explanation:

- Aligns child elements horizontally
- Used for two boxes layout

◊ 13. .box – Content Boxes

Explanation:

- Light background color
- Internal spacing
- Gap between boxes

◊ 14. iframe – Embedded Map

Explanation:

- Controls map size
- Keeps it responsive inside container

15. body – Page Background & Font

- Sets the **font style** for the entire page
- Applies a **background image**
- Ensures the image:
 - Covers the full screen
 - Stays centered
 - Does not repeat

◊ 2. header, footer – Page Header & Footer Style

- Gives header & footer:
 - Light blue background
 - Dark blue text
 - Proper spacing (padding)
 - Uniform font size

◊ 3. Navigation Links (.main-nav a)

- Styles navigation links
- Removes underline
- Adds spacing between menu items
- Keeps text color consistent with header

◊ 4. Anchor Hover Effect (a:hover)

- Adds underline when mouse hovers over links
- Improves user interaction & visibility

• Step By Step Explaination of HTML Code :

① Document Structure & Meta Information

- <!DOCTYPE html> → Declares **HTML5**
- lang="en" → Improves **accessibility & SEO**

- Supports **special characters** and symbols
- Makes the page **responsive** on mobile devices

<link rel="stylesheet" href="style.css">

- Links **external CSS**
- Separates **design from structure** (best practice)

② Header & Navigation Bar

<header>

- <nav class="main-nav">
- <header> → Represents the **top section** of the webpage
 - <nav> → Semantic tag for **navigation links**

Home

About Us

Contact Us

- Anchor tags used for **page navigation**
- Uses relative paths for internal linking

✓ Semantic tags improve **SEO and readability**

③ Main Content Area

<main>

- Holds the **primary content**
- Screen readers recognize this as main page content

④ Contact Form Section

<section class="contact-form">

- <section> → Groups related content
- class="contact-form" → Used for CSS styling

<h1 class="contact-title">CONTACT US</h1>

- Main heading of the page
- Important for **SEO & page hierarchy**

❖ Form Structure

```
<form>
```

- Collects user input
- No action attribute → data not submitted to server yet

❖ Row-wise Input Layout

```
<div class="row">
```

- Used with **Flexbox** in CSS
- Displays inputs **side by side**

```
<input type="text" placeholder="First Name" required>
```

- placeholder → Hint text
- required → Client-side validation

```
<input type="email">
```

- Validates **email format automatically**

```
<input type="tel">
```

- Used for **phone numbers**
- Helps mobile keyboards show numeric keypad

❖ Textarea

```
<textarea placeholder="How can I help you?"></textarea>
```

- Allows **multi-line text input**
- Used for messages/queries

❖ Submit Button

- Submits form data
- Styled using CSS

5 Contact Information Section

```
<section class="contact-info">
```

- Displays **company details**
- Separate from form for better layout

```
<center>
```

 **Deprecated tag** (works but not recommended)

✓ Should ideally use CSS (text-align: center;)

Company Image

```

```

- Displays animated contact image
- Uses relative path

Address & Contact Details

- Plain text for address
- Improves trust & authenticity

Email Link

- Opens **default email client**
- Easy user interaction

Website Link

- External hyperlink
- Opens company website

Social Media Icons

- Uses **image icons** as clickable links

```
<a href="https://twitter.com/">
```

- Clicking image redirects to social platform

Improves user engagement

Footer Section

```
<footer>
```

- Semantic tag for bottom content

```
