```

## **2. Step By Step Explanation :**

### **1. File purpose**

This HTML file builds an Art Exhibition Dashboard with four cards (Gallery, Artists, Bookings, Contact) and an Artist table below.

### **2. Document basics (top of file)**

- `<!DOCTYPE html> + <html lang="en">` set the document type and language.
- `<head>` contains meta tags (charset, viewport) and links style.css.
- `<body>` holds all visible content.

### **3. Headings**

- `<h1 class="heading">` — main page title.
- `<h1 class="sub-heading">` — title for the Artist Table.

### **4. Card container & structure**

- `.box1` is a wrapper for cards and uses flexbox (`display: flex`) to lay them out horizontally with gaps and center alignment.
- Each `.card` contains an `<img>`, an `<h3>`, a `<p>` and a `<button>`.

### **5. Images (paths and sizing)**

- `src="images/filename.png"` is a relative path — the browser looks for an images folder in the same directory as the HTML file.
- `img` CSS sets fixed height: 100px and width: 200px so all card images are uniform.

### **6. Card styling**

- `.card` has background color `#f2f2f2`, fixed width 250px, padding, centered text, rounded corners, and a dark border.
- `.card button` styles the button (padding, background color, white text, rounded).
- `.card:hover` raises the card slightly (`translateY(-5px)`) and adds a shadow for a hover effect.

### **7. Button hover**

- `button:hover` changes the button background and text color and shows the pointer cursor.

### **8. Table structure (HTML)**

- `<table>` contains `<thead>` for column headers and `<tbody>` for artist rows.
- Columns: ID, Artist, Category, Status.

### **9. Table styling (CSS)**

- `.table-container { overflow-x: auto; }` allows horizontal scroll on small screens (but you need to wrap the table in a `<div class="table-container">` in HTML — currently only the class exists).
- `table { width:100%; min-width:600px; padding: 0 50px; }` — table expands to full width but won't shrink below 600px; padding adds spacing (note: padding on table applies to the table element, not each cell).
- `thead tr` sets header background color and white text.
- `th, td` set cell padding, left alignment and a bottom border line.

### **10. Row striping & hover**

- `tbody tr:nth-child(even)` applies a light background to even rows (striped rows).

- tbody tr:hover highlights the row with a light blue when mouse is over it.

## 11. Minor notes / improvements to consider (optional)

- If you want the table to scroll horizontally on small screens, wrap it: <div class="table-container"><table>...</table></div>.
- Consider using box-sizing: border-box; globally so padding doesn't change element sizes unexpectedly.
- Use relative image sizing (max-width) for better responsiveness instead of fixed width/height.
- padding on the table usually works better if applied to td/th instead of the table element.

### 3. Output Screenshot :

**Dashboard Overview :**

The dashboard features four cards:

- Gallery:** See All displayed artworks and collections. (Icon: Paint palette)
- Artists:** Check artist profiles and biographies. (Icon: Artist profile)
- Bookings:** Monitor ticket sales and visitor entries. (Icon: Booking button)
- Contact Us:** Contact for any Art Work related query. (Icon: Envelope and phone)

**Artist Table :**

ID	Artist	Category	Status
01	Vaishnavi Chaudhari	Sketch	Sold
02	Siddhi Phase	Acrylic	On Display
03	Maheesh Shingare	Oil Painting	Reserved
04	Mayuri Gaikwad	Abstract	On Display
05	Aditi Badhe	Watercolor	Reserved
